

Internal Smart Card Reader

Introduction

Most comprehensive card reader ever

This 8-port Smart Card Reader Can be conveniently positioned at the front of your PC enabling the reading of all popular flash cards in a single location. Compatible with high capacity memory cards (SDHC), has dedicated ports for microSD and M2 ports, this eliminates the need for any card adapters.

SIMedit software (included) enables reading and writing to mobile phone SIM cards. Very handy for backing up phonebook contacts, transferring data between the SIM cards or changing PIN numbers. The Smart Card port offers secure online banking (requires bank support) or enables work with security access cards.

Designed to fit 3.5" PC bay, contains two front fascia panels, choose mat black or classic white. Two LED's for power on, card in and data transfer indication.

Features

- 8 port card reader
- Supports all popular memory cards
- Accepts microSD and M2 cards without adapters
- High capacity cards (SDHC) compatible
- Enables SIM card editing and Smart Card reading
- High transfer rate with USB 2.0, max speed up to 480Mb/s
- Easy to install
