

# Connect Your Laptop Smarter

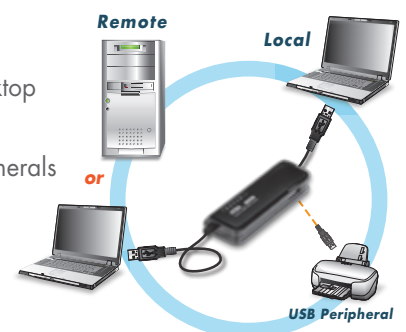

Simply plug in and take instant control of a second computer

## CS661 Laptop USB KVM Switch

**You can now switch between two computers and easily transfer files**

- **KVM functionality for your laptop:** allows you to control both your Local laptop/computer and a Remote laptop/computer
- **File management utility:** offers easy file transfer between two laptops/computers – simply drag and drop
- **Plug and Play:** Auto-run software – no manual installation process required
- **Desktop scaling:** allows you to adjust the size/resolution of the remote desktop window by size or ratio
- **One port USB hub built-in** for the local computer to connect to USB peripherals
- **Compact design with built-in all-in-one USB 2.0 cables**
- **Intuitive graphical user interface (GUI)** for easy operation

# Scenarios- Different ways to use CS661

↘ **SOHO** - A freelancer working from home uses two notebook PCs, one for the home and another for writing assignments on the road. However, this entails continually syncing article versions when she is back in the home office. With the **Laptop USB KVM switch**, she can easily synchronize both via USB and transfer files as well.

↘ **SMB** - A product manager has both a desktop computer and laptop in his office. He uses the desktop for complex tasks and brings the laptop into staff meetings. Without a **Laptop USB KVM switch**, he would need to cope with the hassle of constantly switching between the two. By setting one PC as the primary control console, he can connect another one via a USB port and use one set of inputs to control both computers and easily transfer files between them.

↘ **Small Enterprise** - A network administrator, who is responsible for managing his company's large server room, often needs to check servers, apply patches and updates to specific machines. Using the **Laptop USB KVM switch**, he can simply achieve these tasks connecting his laptop to these servers to take direct control of any server without having to pre-install any software. The file transfer capability also allows software to be copied or installed onto the server.
