

## Safe Capsule made for Time Capsule® Double the storage, Double the protection.

If your current existing Apple Time Capsule's® storage space will soon be filled or has already been used up, meet Safe Capsule from Stardom that not only adds more network storage up to **2 Terabytes** to store your photo & music files but also protects whatever's stored within via **RAID 1** mirroring technology.

### Made for the Time Capsule®

Conform perfectly in size; the Safe Capsule is sleekly designed with high gloss polish exterior finish that goes perfectly with your existing Time Capsule®. Simply stack your Time Capsule® onto the Safe Capsule and connect via the USB port and your safe network storage is ready to go!

**ONE STORAGE VOLUME WITH DATA PROTECTION**

### Designed with the protection of your data in mind

The Safe Capsule is designed with **RAID 1** mirroring technology that provides great protection of whatever is stored within. It holds two independent drives where one is the primary source for you to read data from and write data to and the secondary one mirrors and backs up all the data stored in the source. In other words, if one of the drive was to ever malfunction, you'll always have the other as the spare to continue using.

### Optional storage mode

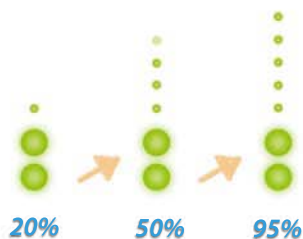

The optional non RAID mode allows you to set up the drives as two independent volumes where you may utilize each differently for various applications.

### Double the protection for your Time Machine® backups

Use the Safe Capsule as an alternative storage for your Time Machine® backups. Simply designate it as your backup drive for the Time Machine® and whenever backups are needed, they will be directed to the Safe Capsule where you will get double the protection of your data stored via the RAID 1 functionality.

**TWO STORAGE VOLUME**

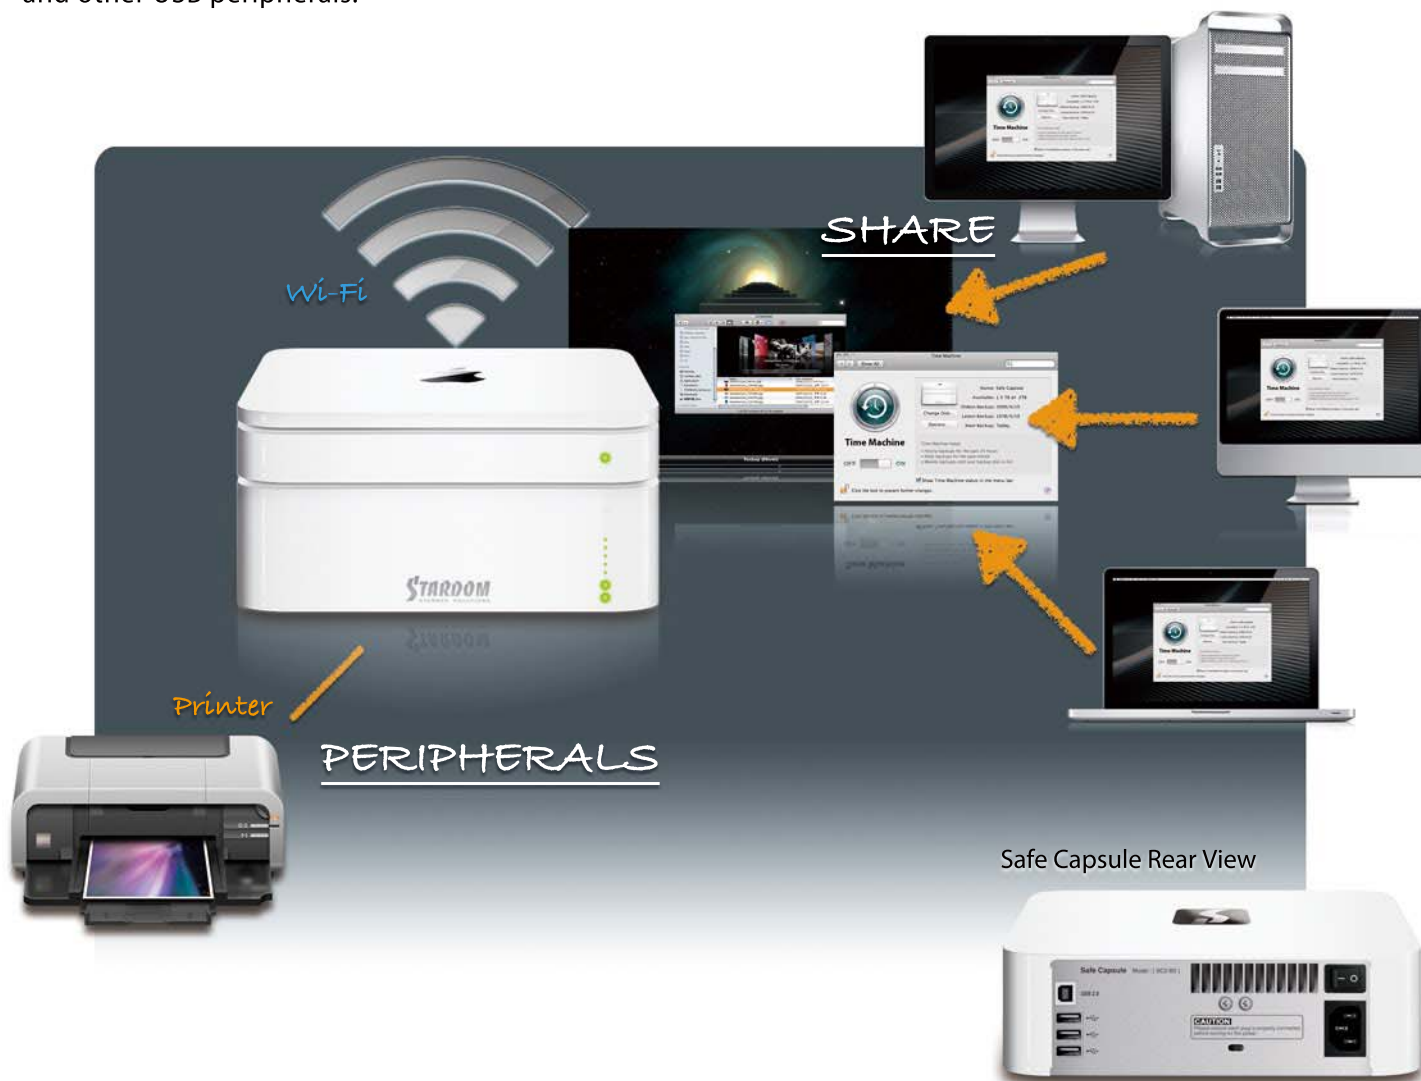

### User-friendly status indicator

Besides the standard power and drive activity indicators, when a new drive has been replaced, the Safe Capsule allows you to know the percentage status of the rebuilding process in which data is being rebuilt to the newly replaced drive so the user is kept informed at all times.

### Sharable by multiple users

Thanks to Time Capsule's networking capability, the Safe Capsule is sharable through either the Ethernet or wirelessly amongst your family members or co-workers to act as a central storage station and moreover, it's also equipped with three USB 2.0 hub extensions for various sharable devices such as printers, flash drives and other USB peripherals.

### Specifications

Model No.	<b>SC2-B2</b>
Certifications	CE, FCC
Host Interface/Ports	1x USB 2.0 high speed port, (USB B type 4pin)
Compatible Drive	• 3.5" SATA-II 3.0Gb/s hard drive (backward compatible 1.5Gb/s) • Supports large volumes up to 2TB
Features	• USB 2.0 • RAID 1 / independent • 6cm ball bearing quiet fan X 1 • Built in USB HUB X 3 ports
Data Transfer	• Depends on network speed when attached to the Time Capsule • 480Mbps when directly attached to the computer system
System Requirements	• Windows XP / Vista; Mac OS 10.2 or later
Product Size/Gross weight/Packing CODE	• 192mm x 192mm x 60mm • 1.6 kg • Retail Box Size: 250 mm x 250 mm x 100 mm • EAN CODE - 4711132862249 • UPC CODE - 884826502661

### Package Contents

- Safe Capsule x 1
- USB 2.0 cable (A type to B type) x 1
- Power cord x 1
- Manual x 1
- Accessory kit x 1
