

OPERATING INSTRUCTIONS

For proper and safe operations, please read these instructions carefully before use.

1. You can connect your notebook computer with this power supply by connecting the detachable adaptor plug.
2. Ensure correct polarity. Please note that the polarity of the small adaptor plugs are preset with the positive tip polarity.

When your notebook computers are with positive tip polarity, please connect the small adaptor plug in such a manner that the positive symbol '+' appears in front of the marking 'TIP' on the cable end. The '+' symbol means the center hole is with positive pole.

3. Set the DC voltage selector at the desired voltage position. (ie. 15V/16V/18V/19V/20V at 6A or 22V/24V at 5A) before you connect it to your notebook computer. You may find the required voltage setting in your original AC adaptor or in the computer user's manual(**PLEASE NOTE THAT AN INCORRECT VOLTAGE SETTING CANNOT POWER UP YOUR NOTEBOOK COMPUTER AND CAN BE DAMAGED YOUR COMPUTER. IF YOU ARE UNSURE, NEVER TRY TO CONNECT IT WITH YOUR COMPUTER. CONSULT WITH YOUR LOCAL DEALER!!!**).
4. Make sure the total loading does not exceed the rated output current of the power supply.
5. Connect the power cord to the power supply first and then insert AC plug into your wall socket. The LED indicator will light instantly.
6. Switch on your computer.
7. Please note : The LED indicator will come on and stay on only when set on any voltage.

CAUTION :

1. Do not short circuit the output terminals.
2. Ensure correct voltage is used as continuous excess voltage could damage your notebook computer.
3. Do not try to use this power supply with appliance requiring more than 6Amp for 15-20V and 5Amp for 22V and 24V (120 watts max.)
4. Do not attempt to open this unit.
5. Remove from mains when not in use.
6. If the supply cord of this power supply is damaged, the power supply should be returned to the manufacturer or his agent for the cord to be replaced. This power supply must be earthed.
