

### • 2 Port USB 2.0 Peripheral Switch

→ In response to the advent of USB 2.0 and the greater speed of connection for our many peripherals, ATEN has developed the US-221 USB 2.0 Peripheral Switches. These two peripheral sharing devices enable 2 PCs to share a single USB peripheral on a one-at-a-time basis using a simple hotkey, the front panel pushbutton, or Windows AP control software to transfer peripheral control among actively connected PCs. This is a perfect tool for today's SOHO environment.

## Features :

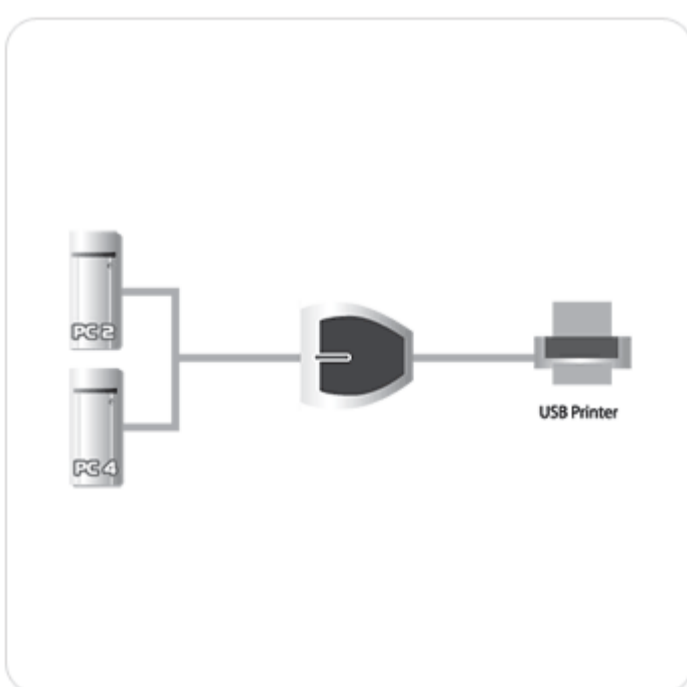

- USB 2.0 compatible
- Hotkey, front panel pushbutton and Windows AP for simple port selection
- Supports transfer rates of 1.5, 12 and 480 Mbps
- Hot pluggable - USB devices can be attached and removed without resetting the system
- LED indicators display port focus
- Overcurrent protection
- Beep indicates PC change and busy status
- Bus powered
- Plug and play

## Package Content :

- 1 US-221 USB Peripheral Switch
- 1 USB Cable
- 1 Software CD ROM
- 1 User Manual
- 1 ATEN Product Guide
